So I finally found the right document; this is the one that came after we accepted all of Lek's changes. I think you captured it in the edits you made.

Also, I accepted almost all of your changes (and explained where I didn't) and added another couple of questions.

Almost there!

Thanks,

Toby

I took a quick swing at all of these, while I had open, even before you find prior version (which was greatly condensed, to my recollection?). We probably need to go back and forth one more time?

Dan
